

SCRUM Meeting 2 for Project 3

Prepared by: Adam Pinto

Meeting Date: 04/02/2023

Meeting Attendees

1. Austin Veselka
2. Siddharth Nair
3. Siddesh Padala
4. Adam Pinto

Meeting Agenda Items

- What have we completed since the last scrum meeting?
- What are the major roadblocks, if any, that have stopped your progress?

Status Update Since Last Meeting

Accomplishments:

- Successfully integrated Google OAuth for login functionality.
- Successfully integrated weather functionality on the menu board.

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
<ul style="list-style-type: none">- Basic HTML structure and functionality - Menu Board Section- Login page and OAuth, html and functionality- Redirect page html set up to link to server, manager and user views	Austin Veselka	yes

Before The Next Meeting

Plans:

- Connect database information to frontend and figure out how to dynamically add HTML elements with Javascript.
- Finish up with most of the remaining tasks.

Task Assignments:

Task Description	Assigned to
<ul style="list-style-type: none">- Basic HTML structure and styling - Menu Management Section- Load menu	Siddarth Nair
<ul style="list-style-type: none">- Basic HTML structure and styling - Inventory Management Section- Basic HTML structure and styling - Analytics Section- Add HTML buttons for each report- Load inventory	William Hipp
<ul style="list-style-type: none">- Add items to the menu by the actual name and allow them to be added to the order	Brian Vu Siddesh Padala

Minutes from Previous Meeting

The biggest roadblock in our project at the moment is figuring out how to connect our Postgres database to our front end. Brian has made some progress on this front by using Node.js to connect to the database, which is most likely how we will move forward with database connectivity.

There will still be a lot of learning/practice left to do in terms of javascript and node. Nobody in our group is that familiar with these technologies so a good amount of time will have to be spent learning them.

From the project manager meeting, we wanted to start thinking about where we would host our web application. We decided that we will probably use Heroku.
